

C4O CITY SOLUTIONS PLATFORM

Terms of Participation

The City Solutions Platform is a programme designed to accelerate climate action in cities through the co-creation of climate solutions and improved engagement with key stakeholders.

When participating in the City Solutions Platform, all organizations must adhere to the following Terms of Participation:

- The City Solutions Platform is being conducted in support of C4O's charitable and educational purpose. Participants may not use the City Solutions Platform for purposes not in furtherance of the goals of the programme, such as commercial activities.
- An organisation's participation in City Solutions Platform activities is not guaranteed. For example, organisations will be invited to participate at the workshops based on a scoring evaluation framework in which each organisation is equally evaluated through pre-determined criteria.
- There are no guarantees that any of the proposed solutions at the end of the innovation process will be implemented in the city. The solution implementation decision is at the discretion of the participating city.
- The costs for the activities that take place in the workshops are financed by the City Solutions Platform programme. Any other associated costs for participation in the co-creation workshops, such as travel and accommodation, are to be self-financed by the organisation.

If you have any questions or need more information, please contact Olivia Bedworth, Manager, Business & Innovation, C4O, via obedworth@c4o.org.
